

To whom it may concern,

I am a listener of Air1 Radio. This radio station has benefit me in many ways that I can count. The two most notable benefits are the fact this station has communicated hope in time of need and also a place where families can tune in without worrying about any "questionable" programmings. Air1 is family friendly. To replace this radio with pop culture radio which has no other value other than entertainment would be a diservice to all communities where Air1 is heard. We have many radio stations already serve the purpose of non educational entertainment, such as gossip minutes, crude humors, sexual humor, etc. Teenagers and many younger generations listen to many garbages from pop radios. Air1 is a place where anybody (young or old) can listen & be encouraged with its positive message of hope, clean humor & family friendly broadcasting.

Thank you for your time,

Sincerely,

Dias Leonardo
